## FINANCIAL AND COMMERCIAL.

TUESDAY, Sept. 3-6 P. M. The following is a comparative statement of the exports (exclusive of specie) from the port of New York to foreign ports for the week and since Janu-

ary I:— 1859. 1860. 1861.
For the week.......\$1,662,160 1883,467 2,706,647
Previously reported...42,898,875 58,603,468 88,901,431 Since January 1 ... \$44,461,044 60,456,915 86,696,978

This is an unusually heavy export, considering that we are exporting no cotton worth mentioning It shows that, notwithstanding the course of the foreign breadstuffs market, Europe is taking from us more grain and flour than we ever sent over before-This movement will effectually tend to keep exchange in our favor, and prevent gold going abroad. The exports from the port of New York for the calendar year 1861 will, in all probability, exceed In aggregate value the total imports.

The trade in commercial paper continues light. First class notes are selling at 6 per cent, and names less highly esteemed at 9 a 12 a 18. A large proportion of the operators, who have hitherto employed their means in commercial paper, are bow buying Treasury notes. The 6 per cents at about 98 are the favorites at present. By and by the 7 3-10 per cents will follow, though the brokers cannot make anything by dealing in them, and are not likely to bestir themselves actively to place them in consequence. The banks paid over the third instalment of ten per cent this morning, making altogether \$10,500,000 paid by them under the agreement of the 19th ult. Mr. Cisco received this morning a draft for \$702,100, to be distributed among the banks in repayment of the first public ubscriptions to the national loan. The subscriptione to-day were moderate. People will not sub scribe largely now until the notes are ready and books of subscription are opened all over the country. The first batch of notes-some \$450,000, chiefly hundreds and fifties-will go forward from tere to Washington to be signed on the 9th inst.—next Monday. The delay which has eccurred in preparing these notes is not creditable to the department or to the Bank Note Engraving Company which had the matter in charge; valuable time is being lost, and room is afforded for assertions, by traitors, that people are not coming forward as they should; whereas the true difficulty is that the people are ready with their money but government is not ready with its notes. Why, it may be asked, too, does not Mr. Chase open books of subscription throughout the North? Why wait any longer?

Foreign exchange for to-morrow's steamer closed rather firmer for sterling, but not so strong for francs. At the close, bankers asked 107% a 34 for their bills on London; but very excellent bankers' bills on Paris were offered at 5, 33% a 35, A large number of bear contracts in stocks are

naturing, and stocks are so scarce that the shorts bid prices up in attempting to effect their deliveries. Thus the short demand for Galena put the price up this morning 1/2 per cent, and the scarcity of New York Central caused an advance of 1/4 per cent in that security likewise. Sympathy with these leading speculative stocks led to an improvement of 3/2 per cent in Rock Island, 3/4 per cent in Toledo, 1/4 in Illinois Central, and 1/4 in guaranteed. Transactions in all these stocks are limited, with the exception of Galena, which is being inflated by speculators with a view to assist the negotiation now pending for obtaining an extension from the creditors on the mortgage bonds about to mature-Pacific Mail was steady; the non-arrival of the Northern Light gives rise, as usual, to some uneasiness. Government securities continue to be in fair demand; the new coupon 6's advanced 1/2 is morning. Missouris were quite active to-day: about \$100,000 of the bonds changed hands this morning, the advance of the day being equal to 1/4 per cent. In Wall street Fremont's proclamation is regarded as likely to improve the credit of the State, as tending to emancipation. Virginias rose 1/4 this morning and Tennessees 1/4, with a small business. After the board the market was steady. In the afternoon it was firm at the prices of the morning and closed so. The follow-ing were the last quotations of the day:-United States 6's, 1881, registered, 883% a 881/2; United Biates 6's, 1881, coupon, 89½ a 90; United States b's, 1874, 79½ a 80; Virginia 6's, 53½ a 55; Tennessee 6's, 43½ a 43½; North Carolina 6's, 61½ a 62; ouri 6's, 41% a 42; Pacific Mail, 76; New York Central, 73¾ a 73¾; Eric, 24½ a 25; do. preferred, 47 a 47½; Hudson River, 32¾ a 33; Harlem, 10½ a 11; do. preferred, 24½ a 25; Reading, 35 a 35½; Michigan Central, 41 a 42; Michigan Southern and Northern Indiana, 13½ a 13½; do. guaranteed, 291/2 a 293/2; Panama, 105 a 100; Illi-nois Central, 647/2 a 65; Galena and Chicago, 663/4 a 67; Cleveland and Toledo, 291/2 a 205/4; Chicago and Rock Island, 41% a 41%; Chicago, Burling-ton and Quincy; '60 a 61; Delaware, Lackawana and Western, 69; Milwaukee and Prairie du Chien, 241/4 a 143/4; Illinois Central bonds, 7's, 91 a 93; Delaware and Hudson Canal, 84 a 841/2; Pennsylwania Coal, 751/2 a 76.

We draw attention to a curious story which will be found in another column with regard to a new employment for the Vanderbilt, Ocean Queen, Bal-

Among the many changes brought about by the resent crisis we notice with lively satisfaction the reform in dry goods credits. The domestic commission houses began the movement by a combination which fixed six months as the extreme term of credit. As a matter of necessity, the foreign importers had to follow, although no combination was entered into. No difficulty has so far been experienced, but we hear that a few of the domestic as well as of the foreign houses are willing to continue to sell on eight months, es pecially such as are in the cloth business. This is done with a view to get the preference of the best houses in the trade. Surely a more short-sighted policy could not be pursued. It probably will pocur to these selfish parties that in fact they guarantee so much as they sell on eight menths to their more conscientious and careful competitors. Most fortunately the number of these eight months' houses is too small to influence the majority to follow suit. The auctioneers, we learn, are at present only selling for cash, but will, after October, probably sell only on four months' credit, If they give any credit at all. The always shrewd firm of A. T. Stewart has at once curtailed its credits to country retailers to ninety days, and of course our other jobbors will follow. The strongest and most substantial of these houses have all expressed their hesire to see credits shortened, and, considering all these facts, we may safely predict a most healthy affect on the trade in general. The idea that eight months are wanted to distribute dry goods is ab-Burd, as times are; it arose before the country was crossed in every direction by telegraphs and railroads, and before steamers ran on almost every river or lake. The very fact that the dry goods trade always suffers the most and the first at every disturbance, whatever be its cause, is a proof of the rottenness of the long credit system. Over Importation has had its share in keeping it up so long; but at present no such event is likely to occur and this is, therefore, the time to establish the new system of short terms, and those commission and Importing houses which have escaped the present sales embraced about 17,000 bbls, cleaner within crisis without injury have at once seen the neces-city of its adoption, while the very few who are not shrewd enough to perceive this may by and by recognise the argument for self-protection.

The Philadelphia Bulletin of last evening says:—
In monetary circles there is very little doing, and no change from the present stagnant condition of affairs can be anticipated until there is more activity in business affairs. The official returns of the banks to morrow will show a decline of \$700,000 in their specie deposits for the last two weeks. Bleanwhite they have paid into the Sub-Treasury, on account of the United States loan, about one nufflent olduras, which leaves the specie line upwards of six midlions—more than ample for all present banking purposes. Two of the instalments of ten per cent each of the dive million toan has already been paid, and another ten per cent will be paid in a few days. The gold has already commenced returning to the banks from the government contractors.

Relative to exchange the Chicago Trillows of

Relative to exchange, the Chicago Tribune of Saturday remarks:-

The supply of Eastern exchange is still heavier than the requirements of our merchants, and rates rule dull at par to 14 per cent premium. Currency is in good demand and scarce. Gold is in good request at 14 a 34 per cent

The Philadelphia Ledger of to-day says:—
The payments into the Sub-Treasury tell upon the bank statement of averages. The increase of loans the past week is \$1,100,147, and the week previous it reached \$63.440.033, making an addition to their source of revenue of \$4,536,180—that is to say the banks show an average of that amount more at interest than they had a fortnight ago. The banks in the same time show an apparent loss of \$586,638 of \$950-6,810 of specie, though this is more apparent than real, as the amount paid out is almost as apickly drawn back by government drafts, received through their depositors, who have received them in liquidation of stores, &c., furnished to the government. There is no real loss of coin to the city, as we observe the banks and the Sob-Treasury together hold an aggregate of \$7,101,517—as greater sum than at any time before in the last five years. The deposits have again increased largely, though not nearly so much as during the previous week.
